Clever SSO

Initial Setup · https://docs.dacapoinventory.com/doc/clever-sso/

Overview

Clever Single Sign-On (SSO) is a secure and convenient way for school district employees to log in to **Da Capo Inventory** using their district credentials. This eliminates the need for a separate username and password, simplifying access while maintaining strong security.

How It Works

When your district is connected through Clever, staff can log in to Da Capo Inventory directly from the **Clever Portal**. Clever authenticates the user's identity using the district's existing credentials and passes that verification to Da Capo Inventory. This means:

- No separate Da Capo username or password is required.
- Authentication is handled entirely through Clever's secure platform.
- Only verified district users with licensed accounts on **Da Capo Inventory** are granted access.

Important Note

Da Capo Inventory uses **Clever for Single Sign-On only**. It **does not support Clever Rostering** at this time, meaning student and staff data are not automatically synced between Clever and Da Capo Inventory. If you are interested in the Da Capo Inventory SYNC feature (migrating students from your school information system to Da Capo Inventory nightly), please contact Da Capo Inventory Support.

Getting Started

1. Log in to your district's **Clever Portal**.
2. Locate the **Da Capo Inventory** application tile.
3. Click to sign in—no additional login steps are required.

Support

If you experience login issues, please contact your district's Clever administrator or Da Capo Web Development support.
