Entire Site Search

Initial Setup · https://docs.dacapoinventory.com/doc/entire-site-search/

Need a student or an assigned instrument fast? Site Search looks across your program so you are not hunting building by building.

Where to go

Open **search.php** from your bookmarks or internal links when offered. The top navigation also has a quick search that jumps to related results.

What you can do from results

- Open a student to modify details or see contact / balance information.
- Assign an instrument when the result supports it.
- Jump to modify an inventory item.

Use clear search terms (last name, student ID, serial) for the best matches. Site Search complements — it does not replace — your building Inventory and Enrollment pages.
