District Attrition Report

Department Leader Documentation · https://docs.dacapoinventory.com/doc/district-attrition-report/

See which students left programs — building, year, program, teacher, and grade — so you can spot patterns and plan recruitment.

Where to go

Manage Enrollment → District Attrition Report (Directors)

How to use it

1. Open the report.
2. Review each drop: building, program, teacher, grade, and district student ID when shown.
3. Use row actions when available to investigate further.

Good to know

- Students who reenroll are removed from this attrition list (so the report stays focused on true leavers).
- Pair this with enrollment and former-student tools when preparing for board or department conversations.
