Incoming Student Rankings

Enrollment · https://docs.dacapoinventory.com/doc/incoming-student-rankings/

See rankings from feeder buildings so next year’s seating or placement conversations start with shared data.

Where to go

Manage Students → Incoming Rankings

(Available when ranking features are on and feeder buildings send students into your building.)

How to use it

1. Open Incoming Rankings.
2. Review the feeder building list.
3. Toggle instrumental vs vocal ranking access when those options appear.
4. Review rankings for planning.

Notes

- Instrumental views often use each student’s default instrument.
- Choral / vocal views use vocal part information.
- Rankings are planning tools — still confirm with the sending teacher when something looks unexpected.
