Library Performance History

Library · https://docs.dacapoinventory.com/doc/library-performance-history/

Performance History lets you log when your ensemble performed a piece — concert date, optional video link, and which works were on the program. Over time you build a living record of what your groups have played.

Where to go

Library → Performance History

Log a performance

1. Open Performance History.
2. Enter the **performance date** (required).
3. Optionally add a **YouTube** (or similar) link to a recording.
4. Choose the **ensemble** — use the course-group buttons, or type a custom ensemble name.
5. Select one or more **library pieces** that were performed.
6. Save.

Tip: Course-group buttons appear when you have teacher course groups set up. If you do not see them, type the ensemble name.

Update or remove an entry

- Use **Modify Piece** when the program details need a correction.
- Use **Delete Performance Info** when an entry was created by mistake.

Why this helps

- Remember what you programmed last year before you plan this year.

- Share a performance list with a colleague or guest conductor.
- Connect library pieces to real concerts — not only to folder checkouts.

Add entries soon after the concert while the program is still on your music stand.
