Set a Password for your new account

Initial Setup · https://docs.dacapoinventory.com/doc/set-a-password-for-your-new-account/

1. Using any modern browser that has JavaScript enabled, preferably Chrome, click the link in the ‘Welcome Email’ that you received.
2. Set a password for your account that contains letters, numbers, and symbols. Please remember your password.

> It is best practice to use a strong, unique password for each site on the internet. We recommend that you use a password manager to maintain your list of password lists. Most password managers can sync between all of your devices. Simply search for ‘password manager’ online and you can read reviews about many different password managers including 1Password, LastPass, Dashlane, Bitwarden, and others. Many of these password managers have free tiers with many features.
